

Item No.: SE2905-8R

Hydraulic power pack with fixed displacement pump

Ideal for individual hydraulic work benches or UniTrain

- Portable pack aluminium base plate with rubber bearings
- Pump design: gear wheel with external cogs (0,8ccm/U) and 4 MPa (40 bar) pressure valve
- Operating pressure 6 MPa (60 bars)
- Manometer, 0-60 bars
- Motor: AC, single-phase motor with starting capacitor and ON/OFF switch
- Tank: volume 2.5 l, inspection window
- Low susceptibility to oil leaks, self-sealing coupling lugs and quick-release couplings for pressure and tank connectors
- Self-sealing coupling lug for unpressurised reflux
- Quick-release coupling for output
- Dimensions: 500 x 250 x 300 mm (W x D x H)
- Weight: 14 kg
- Funnel for filling system
- 2 high-pressure tubes with quick-release couplings
- Nominal voltage: 230 V AC, 50/60 Hz
- Nominal power: 0.37 kW
- Throughput (at nominal speed): 1 l/min at 1400 rpm

Note:

For safety reasons the hydraulic power pack is always delivered without any oil inside. Please order the oil separately.
