

Item No.: LM9684

## Testing station

A testing station that checks workpieces on a conveyor belt for material and colour.

- 4 Binary testing sensors (2 x optical, inductive, capacitive)
- Magnetic end-limit sensor
- Two-way stop cylinder
- 4/2-way valve
- PLC interface: 25-pin SUB-D connector
- PLC requirements: 1 x digital output, 5 x digital inputs

To assure functionality and a long working life for pneumatic components and controls, a maintenance unit is required, consisting of: filters, pressure control valve with pressure gauge and lubrication.
