

Item No.: LM9603

Double conveyor belt segment, passive

Basic mechatronic module with no built-in drive, primarily designed for extending powered conveyor belts in complex mechatronic systems. Drive is provided via a belt transmission or by mechanical coupling to another belt or curved segment.

- Length = 600mm/23,6", width = 160mm/6,3", belt width = 120mm/4,7"
- Extra drive belt
