

Item No.: SO4204-2D

UniTrain component kit, transistor circuits

Includes:

- Documentation on CD-ROM
- 30 resistors, 8 transistors, 1 diode
- 7 potentiometers, 8 capacitors

Course contents:

- Common source and common drain circuits with field-effect transistors
- One and two-stage transistor amplifiers
- Differential amplifiers
- Fault simulation
- Constant current source with FET
- Constant current source with bipolar transistor
